

Lab 2: Agile Backlog Creation & Sprint Simulation in Jira

JIRA-BASED SCRUM PROJECT

PHARMACY EXPIRY & RE-ORDER ENGINE(15)

Project Key: PEROE

NAME: PURUSHOTHAMA K C

SRN: PES1UG25AM810

Epic / User Stories	As a	I want to	So that
Epic 1: Medicine Inventory Management			
Description: Manage medicine stock, batches, quantities, and inventory information in the hospital pharmacy.			
Story 1.1: Medicine Stock Tracking	As a Pharmacy Clerk	I want to view medicine stock levels	So that I can monitor available inventory
Story 1.2: Medicine Batch Management	As a Pharmacy Clerk	I want to manage medicine batches and quantities	So that inventory records remain accurate
Epic 2: Expiry & FEFO Management			
Description: Track medicine batch expiry dates and ensure medicines are dispensed using First-Expired-First-Out (FEFO).			
Story 2.1: Medicine Expiry Tracking	As a Pharmacy Clerk	I want the system to track medicine batch expiry dates	So that I can identify batches approaching expiry
Story 2.2: FEFO Dispensing	As a Pharmacy Clerk	I want the system to prioritize the medicine batch with the nearest valid expiry date	So that medicines are dispensed using First-Expired-First-Out

Epic 3: Automated Re-order Management

Description: Monitor medicine stock levels and automatically generate purchase orders when stock falls below the safety threshold.

Story 3.1: Stock Threshold Monitoring

As a
Pharmacy
Clerk

I want the system to monitor medicine stock against the safety threshold

So that low-stock medicines can be identified

Story 3.2: Automatic Purchase Order Generation

As a
Pharmacy
Clerk

I want the system to automatically generate a purchase order when stock falls below the safety threshold

So that medicines can be reordered on time

Epic 4: Supplier & Dispatch Management

Description: Send purchase order requests to the inventory supplier and track replenishment orders.

Story 4.1: Supplier Purchase Order Dispatch

As an
Inventory
Supplier

I want to receive purchase order requests

So that I can process medicine replenishment

Story 4.2: Re-order Status Tracking

As a
Pharmacy
Clerk

I want to track the status of supplier orders

So that I know when medicine replenishment is expected

PEROE Sprint 2 Board with All Stories in To Do

The screenshot shows the Jira interface for the 'PEROE board' under the 'Pharmacy Expiry & Re-order Engine' space. The board is in 'Active sprints' view. The 'TO DO' column contains four items: 'Supplier Purchase Order Dispatch' (5 points), 'Medicine Stock Tracking' (3 points), 'Medicine Expiry Tracking' (3 points), and 'Re-order Status Tracking' (3 points). All items are currently in the 'TO DO' column. The 'IN PROGRESS', 'IN REVIEW', and 'DONE' columns are empty.

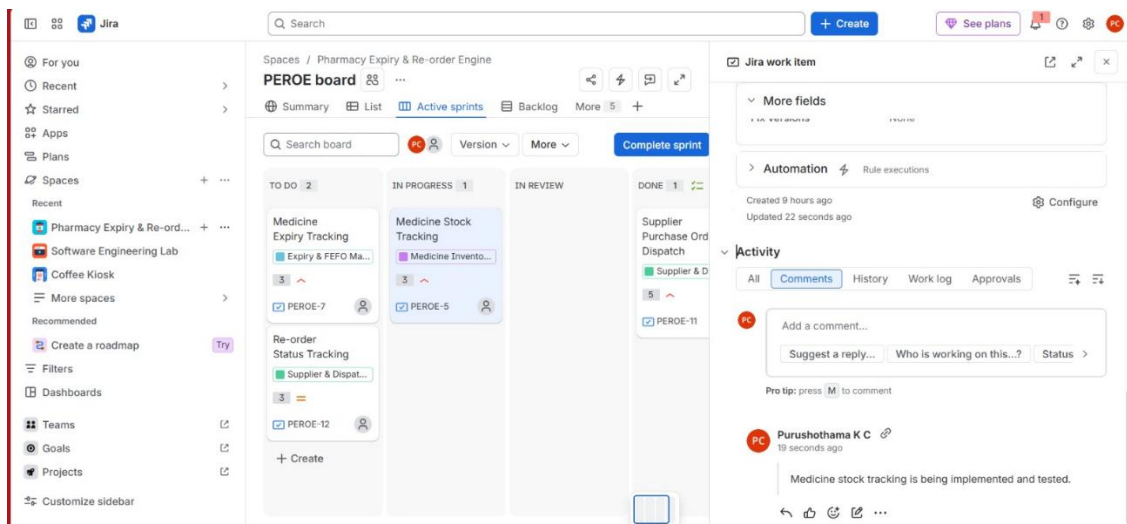

Supplier Purchase Order Dispatch Moved to In Progress with Comment

The screenshot shows the Jira board after the 'Supplier Purchase Order Dispatch' item has been moved to the 'IN PROGRESS' column. The 'TO DO' column now contains three items: 'Medicine Stock Tracking' (3 points), 'Medicine Expiry Tracking' (3 points), and 'Re-order Status Tracking' (3 points). The 'IN PROGRESS' column contains one item: 'Supplier Purchase Order Dispatch' (5 points). The 'IN REVIEW' and 'DONE' columns are empty. On the right, the 'Jira work item' panel shows the details for the 'Supplier Purchase Order Dispatch' item, including a comment by 'Purushothama K C' stating: 'Supplier purchase order dispatch is being implemented and tested.'

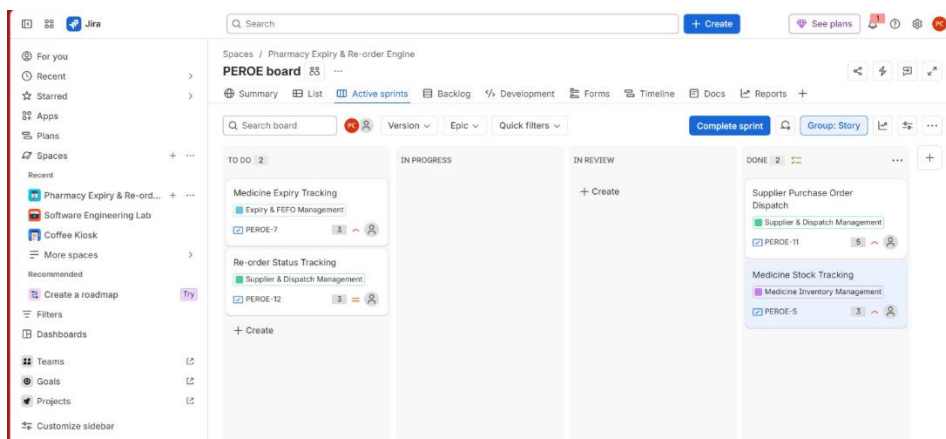

Supplier Purchase Order Dispatch Completed

Medicine Stock Tracking Moved to In Progress with Comment

Medicine Stock Tracking Completed

Medicine Expiry Tracking Moved to In Progress with Comment

The screenshot shows a Jira board for the 'PEROE board' in the 'Pharmacy Expiry & Re-order Engine' space. The board has four columns: 'TO DO' (1 item), 'IN PROGRESS' (1 item), 'IN REVIEW' (0 items), and 'DONE' (2 items). The 'IN PROGRESS' column contains a work item titled 'Medicine Expiry Tracking' (PEROE-7) assigned to a user. A comment by 'Purushothama K C' is visible, stating 'Medicine expiry tracking is being implemented and tested.' The right sidebar shows the 'Jira work item' details, including fields, automation, and activity.

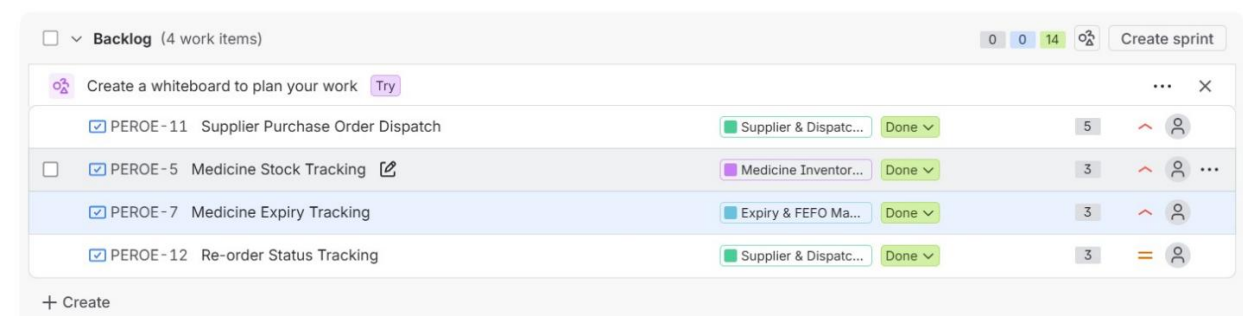

PEROE Sprint Board Showing Completed Work Items

The screenshot shows the same Jira board, but now the 'DONE' column contains four completed work items: 'Supplier Purchase Order Dispatch' (PEROE-11), 'Medicine Stock Tracking' (PEROE-5), 'Medicine Expiry Tracking' (PEROE-7), and 'Re-order Status Tracking' (PEROE-12). Each item shows its title, a brief description, and the assigned user. The board navigation bar at the top includes options like 'Summary', 'List', 'Active sprints', 'Backlog', 'Development', 'Forms', 'Timeline', 'Docs', and 'Reports'.

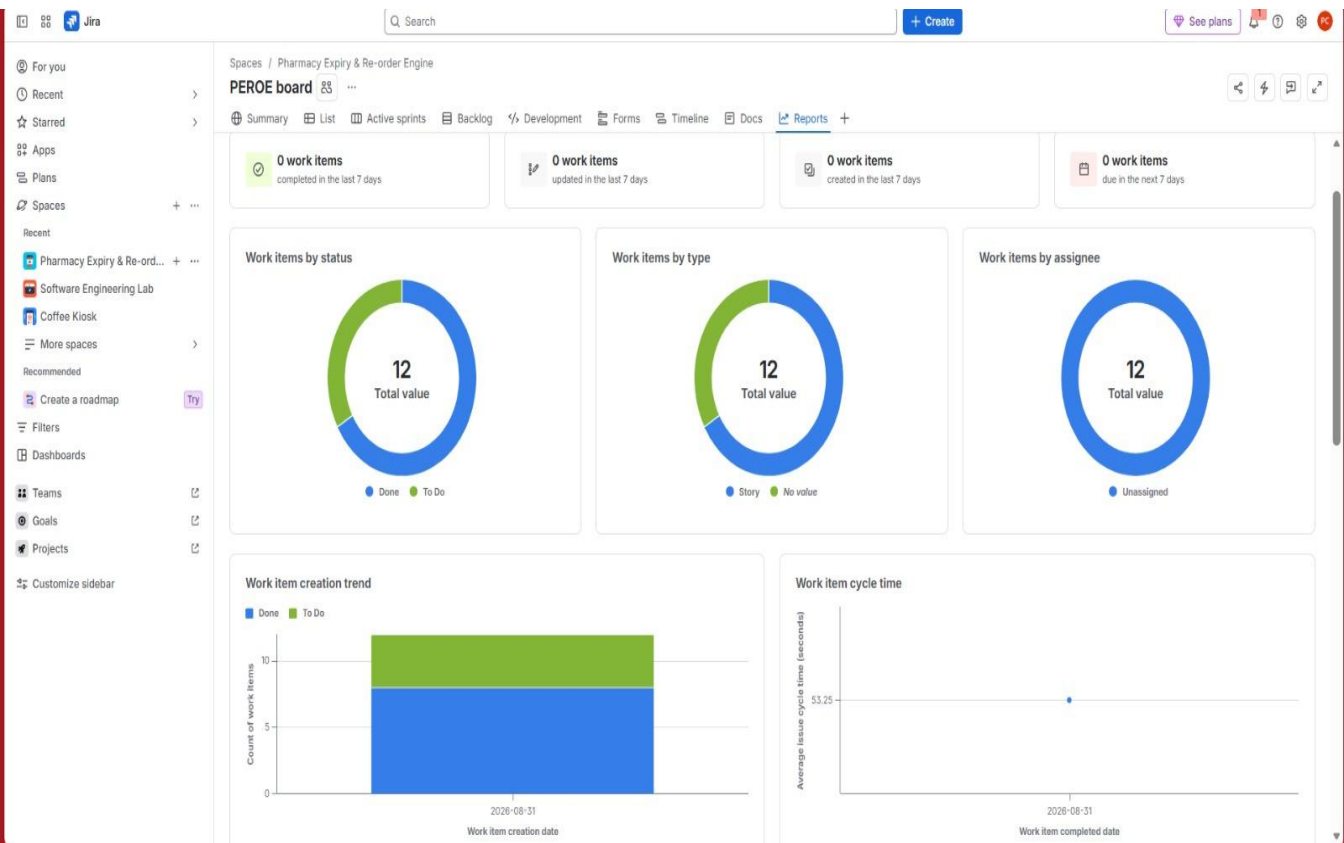

Completion of PEROE Sprint 2

The screenshot shows a confirmation dialog box titled 'Complete PEROE Sprint 2'. It features a trophy icon and the text: 'This sprint contains 4 completed work items. That's all of them - well done!'. At the bottom, there are two buttons: 'Cancel' and 'Complete sprint'.

6.Group Reflection

Objective

The group reflected on the Sprint 1 and Sprint 2 activities carried out in Jira for the Pharmacy Expiry & Re-order Engine (PEROE) project.

What We Did Well

- Successfully created and organized the required Epics and User Stories in Jira.
- Assigned appropriate Story Points using planning and team discussion.
- Prioritized the backlog based on the importance of each functionality.
- Created and managed Sprint 1 and Sprint 2.
- Practiced moving work items through To Do, In Progress, and Done.
- Added comments to work items to record implementation and testing progress.
- Generated and analyzed the Sprint Burndown Chart.
- Completed all planned work items in the sprint.

Challenges Faced

- Understanding Jira's sprint and backlog management features initially required some practice.
- Deciding suitable Story Point values required team discussion.
- Managing priorities and moving stories between different sprint statuses required coordination.
- Generating and interpreting the Burndown Chart required understanding how completed Story Points affect remaining work.

What We Learned

Through this activity, we learned how Scrum and Agile project management can be implemented using Jira. We understood the importance of backlog prioritization, sprint planning, Story Points, task tracking, progress monitoring, and team communication.

Improvements for Future Sprints

- Improve estimation accuracy through better team discussion.
- Assign work items to specific team members.
- Complete tasks progressively instead of completing them at the end of the sprint.
- Add more detailed comments and updates during implementation.
- Use Burndown Charts regularly to identify delays and manage sprint progress.

Conclusion

The group successfully completed the Jira-based mock sprint and gained practical experience in Agile Scrum project management. The activity improved our understanding of sprint planning, backlog management, task tracking, collaboration, and progress monitoring.
